

For the Public's **Health & Safety**  
and for the safety of our patients and visitors:

**We ask that you do not come to visit patients in the Hospital if you have any of the following symptoms: fever, cough, sore throat, nausea, or diarrhea.**

**Children under 18 years of age should not be brought to visit patients in the hospital during flu season as that population has been determined to be more susceptible to the H1N1 (Swine Flu) virus. However, families with special situations (such as a gravely ill relative) should contact a nurse supervisor so that special arrangements can be made.**

**Your cooperation is appreciated in helping us protect your loved ones.**
